## OVERVIEW OF PRACTICES

### Introduction

'Garbage Concern' is a NGO dealing with the garbage from residential area, school, workplace, markets, restaurants, marriages, parties and temples together with festivals, pilgrimage sites.

### 3R Good Practice

Garbage Concern conducts compost projects in Slum community, Schools, Corporate and Institutions, Housing Society, Gardens, and other concerned places with the collaboration of localities. This project includes several phases such as

- **Sensitization**

Where the project starts with awareness programme such as segregation of waste among concerned population

- **Project Costing**

Based on sustainability analysis, the facilities, manpower and financing, site for wet garbage collection and compost pits are finalized.

- **Project Initiation**

Daily monitoring of site and the compost produced is carried out by the Garbage Concern's trained staff does. The composting process takes about 1.5-2 months.

- **Sustainability**

The maintenance activity is generally taken over by the locality. The compost products are used for greening of their own locality.

Waste segregation

Bins used for collecting food waste

Community composting pit

Wet garbage to compost pit
