## OVERVIEW OF PRACTICES

### **Introduction**

The Global Environmental Forum (GEF) is a non-profit organization founded in May 1990. The missions are to conduct and support scientific research on global environmental issues and to disseminate those research findings to the public and to make policy recommendations. It also coordinates and links among the public sector, private sector, NPOs/NGOs, and media in a cross-sectoral manner in order to solve global environmental issues, such as climate change, forest deforestation, and desertification and to develop sustainable society.

### **Activity**

- Advancing the spread of "Reuse Cup"
- Establishing the "Reusable Eco-Foodware Network"

Global Environmental Forum is advancing the spread of "Reuse Cup" in the soccer stadium and the event site as a symbolical activity from "Disposable" to "Reuse". A group of 20 or more from all around Japan joined together to form the "Reusable Eco-Foodware Network" and established as a network organization of the group that tries to spread reuse of tableware across the nation.
